Accessory PHD2 - Installation Guide

Before removing the system casing, in the interests of safety please first turn off your computer and unplug it from the power supply.

Remove the two covers which are on both sides of your XS35.

Tighten the two nuts first just as shown.

Two Nuts

As shown, install the HDD Adapter Card with two screws and connect the cable to CN1.

Mount HDD into the bracket with screws.

As shown, install the HDD & bracket in the chassis and push it towards the direction as indicated by the yellow arrow to connect the HDD connector (CN9).

Turn your XS35 upside down and tighten the hard disk and bracket with one screw.

Replace system casing and fasten the cover screw in place.
